

EWP Load Test Record Template

A blank record template for load testing an elevating work platform — for competent persons and record-keeping.

Template for record-keeping convenience — the competent person conducting the test determines the applicable test requirements, methods and loads in line with AS 2550.10, AS/NZS 1418.10 and the manufacturer's requirements.

MACHINE DETAILS

Make & Model: _____ **Serial / Unit No.:** _____

Year of manufacture: _____ **Rated capacity:** _____

Owner / Operator: _____ **Location:** _____

TEST DETAILS

Date of test: _____ **Test load applied:** _____

Test method: _____ **Machine configuration:** _____

Ambient conditions: _____ **Attachments fitted:** _____

FUNCTIONAL CHECKS

Check	Method / Observation	Result
Lift function under load		
Lower / descent under load		
Slew / rotation under load		
Extend / retract under load		
Stability / outrigger performance		
Overload / envelope limiting device		
Tilt / level sensing device		
Emergency / manual descent		
Structural — no permanent deformation		
Hydraulic — no leaks or cylinder drift		

RESULT

Overall result (Pass / Fail): _____ Retest date (if applicable): _____

Defects / observations: _____

Rectification required: _____

VERIFICATION
